

generic or sub-generic to more than one of the alleged  
patentably distinct species identified by the Examiner. For  
example, applicants submit that at least claim 1 is considered  
to be generic or sub-generic to more than one species, as  
identified by the Examiner. Additionally, applicants note  
that since the Examiner has identified species A - F as the  
patentably distinct species of the claimed invention,  
applicants consider that no other patentably distinct species  
is considered to be present by the Examiner, and therefore,  
applicants consider that claims not specifically readable on  
one of the species identified by the Examiner are necessarily  
included with any elected species.

Moreover, applicants submit that upon allowance of a  
generic or sub-generic claim, all dependent claims directed to  
other patentably distinct species as identified by the  
Examiner necessarily become allowable.

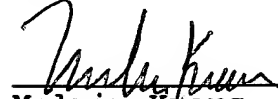

In order to provide a complete response to the election  
requirement, as stated, applicants provisionally elect, with  
traverse, species A with claims 1-16 being readable thereon,  
claims 1-3, 15 and 16 being independent claims.

For the foregoing reasons, withdrawal of the election  
requirement and favorable action with respect to all claims  
present in this application are respectfully requested.

To the extent necessary, applicant's petition for an  
extension of time under 37 CFR 1.136. Please charge any  
shortage in the fees due in connection with the filing of this  
paper, including extension of time fees, to Deposit Account

No. 01-2135 (503.32492X00) and please credit any excess fees  
to such deposit account.

Respectfully submitted,

Melvin Kraus
